

College Overview

[illegible]

undergraduate and postgraduate programs in engineering, technology, management, and applied sciences. The campus includes smart classrooms, modern laboratories, a central library, innovation centers, sports facilities, hostels, and student activity clubs. The college promotes outcome-based education, industry collaboration, research activities, entrepreneurship, and professional development. Students participate in technical symposiums, hackathons, internships, industrial visits, and certification programs throughout their academic journey.
